Chapter 1: Hardware Installation

1.1 Requirements

The following items are required for installation of your adapter:

- A ThinkSystem RAID 530-8i PCIe Adapter
- A host system with an available PCI Express (PCIe) expansion slot
- The *ThinkSystem Storage Adapter Software User Guide*
- Standard 12Gb/s SAS cables for connections to SAS/SATA drives, backplanes, or SAS expanders

1.2 Hardware Installation Instructions

To install your Lenovo adapter, follow these steps:

1. **Unpack the adapter, and inspect it for damage.** Unpack the adapter in a static-free environment. Remove the adapter from the antistatic bag, and carefully inspect the adapter for damage. If you notice any damage, contact Lenovo or your reseller support representative.

ATTENTION To avoid the risk of data loss, backup your data before you change your system configuration.

2. **Prepare the computer.** Turn off the computer, and disconnect the power cord from the rear of the power supply.

CAUTION Disconnect the computer from the power supply and from any networks, or you risk damaging the system or experiencing electrical shock.

3. **Remove the cover from the chassis.**
4. **Check the mounting bracket on the adapter (system- dependent)** If required for your system, replace the full-height mounting bracket that ships on the adapter with the low-profile bracket supplied. Complete the following steps to attach the low-profile bracket.
 - a. Using a No. 1 Phillips screwdriver that is ESD safe, remove the two Phillips screws that connect the full-profile bracket to the board. Unscrew the two screws located at the top and bottom edges of the board. Avoid touching any board components with the screwdriver or bracket.
 - b. Remove the full-profile bracket. Do not damage the adapter.
 - c. Place the adapter on top of the low-profile bracket. Position the bracket so that the screw holes in the tabs align with the openings in the board.
 - d. Using a No. 1 Phillips torque screwdriver that is ESD safe, set to a maximum torque of 4.8 ± 0.5 inch-pounds. Replace the two Phillips screws removed in step a.

ATTENTION Exceeding this torque specification can damage the board, connectors, or screws, and can void the warranty on the board.

5. **Insert the adapter into an available PCIe slot.** Locate an empty x8 PCIe slot adequate for your adapter. Remove the blank bracket panel on the rear of the computer that aligns with the empty PCIe slot. Save this bracket screw, if applicable. Align the adapter to a PCIe slot. Press down gently, but firmly, to seat the adapter correctly in the slot. The following figure shows how to insert the adapter into a PCIe slot.

NOTE The shape, size, and locations of the components on your adapter and its bracket might vary from this illustration. The adapter requires an x8 PCIe slot.

Figure 1 Installing the ThinkSystem RAID 530-8i Adapter in a PCIe Slot

6. **Connect SAS cables between the adapter and the SAS backplane or any other SATA device or SAS device.** The ThinkSystem RAID 530-8i adapter has two SFF-8643, internal x4, mini-SAS HD connectors. Use cables with an external or internal mini-SAS HD connector on one end to connect to the adapter and the appropriate connector on the other end to attach to the backplane or the SAS/SATA devices. Connectors must be cabled to specific drive slots, as shown in the following table.

Connector	Drive Slots
C0	Drive slot 0-3
C1	Drive slot 4-7
C2	Drive slot 8-11
C3	Drive slot 12-15
C4	Drive slot 16-19
C5	Drive slot 20-23

NOTE See [Section 2.5.1, Board Layout, LEDs, Jumpers, and Connectors](#) for more information about the connectors for your adapter.

7. **Replace the cover and reconnect any cords and cables, and power up the system.** Replace the chassis's cover, reconnect any power cords, and reconnect any network cables. Turn on the power.

8. Run the Human Interface Infrastructure (HII) Configuration Utility

Run the HII Configuration Utility to make any desired configuration changes. Refer to the *ThinkSystem Storage Adapters Software User Guide* for detailed steps on drive configuration.

The hardware installation of your adapter is complete.

1.3 Installing the Driver

This adapter can operate under various operating systems; however, you must install the software drivers. The firmware and drivers are routinely updated and made available on the Lenovo web site. Refer to <http://support.lenovo.com> for details on the software versions and device driver support.

Chapter 2: Overview

2.1 Overview

The ThinkSystem RAID530-8i 1GB PCIe 12Gb adapter, based on the LSI SAS3408 RAID On-a-Chip (ROC) device, is a high-performance PCIe-to-SATA/SAS adapter.

Each adapter provides the following storage interface data transfer rates:

- SAS data transfer rates of 12Gb/s, 6Gb/s, and 3Gb/s per lane
- SATA data transfer rates at 6Gb/s and 3Gb/s per lane

The adapter negotiates between the speeds and the protocols to recognize and concurrently interface with any of these storage devices.

The following list summarizes many of the key features of the ThinkSystem RAID 530-8i PCIe adapter.

- Ports - 8 internal
- I/O processor - SAS3408
- Form factor - LP-MD2
- Storage interface connectors - Two SFF-8643 x4
- Host interface - x8 PCIe 3.1
- Storage interface - SAS and SATA

2.2 RAID Features

The following list includes some of the primary RAID features supported by the storage adapter. For a full description of the RAID features, refer to the *ThinkSystem Storage Adapter Software User Guide* on the Lenovo support web site at <http://support.lenovo.com> for details.

- RAID levels 0, 1, and 5
- RAID spans 10 and 50
- Online Capacity Expansion (OCE) online RAID Level Migration (RLM)
- Auto resume after loss of system power during array rebuild or reconstruction (RLM)
- Single controller multipathing
- Load balancing
- Fixed 64K stripe size
- Fast initialization for quick array setup
- Check Consistency for background data integrity
- Solid state drive (SSD) support with SSD Guard™ technology
- Patrol read for media scanning and repairing
- 64 logical drive support
- Dynamic data formatting (DDF) compliant configuration on disk (COD)
- Self-monitoring, analysis, and reporting technology (S.M.A.R.T.) support
- Global and dedicated hot spare with revertible hot spare support
- Automatic rebuild
- Enclosure affinity
- Emergency SATA hot spare for SAS arrays

- Enclosure management
- SCSI enclosure service (SES) (inband)
- Serial general purpose input output (SGPIO) (sideband)
- Shield state drive diagnostic technology

2.3 Functional Descriptions

2.3.1 PCIe Host Interface

The ThinkSystem RAID adapters have eight PCIe PHYs, which provide host-side maximum transmission and reception rates of 64 Gb/s (8 Gb/s per PHY). The RAID adapters use a packet-based communication protocol to communicate over the serial interconnect. Other PCIe host interface features include:

- Eight PCIe host lane interface
- Power management
 - Supports the *PCI Bus Power Management Interface Specification*, Revision 1.2
 - Supports Active State Power Management by placing links in a power-saving mode during times of no link activity
- Error handling
- High bandwidth per pin with low overhead and low latency
- Lane reversal and polarity inversion
- Single-phy (one-lane) link transfer rate of 8GT/s, 5GT/s, and 2.5GT/s in each direction
- Eight-lane aggregate bandwidth of up to 8 GB/s (8000 MB/s)
- Support of x8, x4, x2, and x1 link widths

2.3.2 SAS/SATA LED Operation

LED signals indicate an error condition or drive activity. SAS/SATA LED management is supported by SGPIO. The functionality is described in the SFF-8485 specification.

See [Section 2.5.1, Board Layout, LEDs, Jumpers, and Connectors](#) for the descriptions and locations of the LEDs on your adapter.

Refer to the *Lenovo ThinkSystem Storage Adapter Software User Guide* for more information about actions you can take related to the LEDs.

2.4 Operating System Support

To check for the latest list of supported operating systems and to download the device drivers for those operating systems, go to <http://support.lenovo.com>.

2.5 Adapter Characteristics

2.5.1 Board Layout, LEDs, Jumpers, and Connectors

The RAID 530-8i adapter is a 6.127 in. x 2.712 in. (155.65 mm x 68.90 mm) board. The component height on the top and bottom of the adapter complies with the PCIe specification. This subsection provides the board layout, and the LED, connector, and jumper information for the adapter.

The following figure shows the LEDs, jumpers, and connectors on the adapter.

Figure 2 Board Layout for the RAID 530-8i PCIe Adapter

The following table describes the LEDs, jumpers, and connectors on the adapter.

Table 1 LEDs, Jumpers, and Connectors

Jumper/Connector	Type	Description
J2	Standard edge card connector	The interface between the adapter and the host system Along with the PCIe interface, this connector provides power to the board and an I ² C interface connected to the I ² C bus for the Intelligent Platform Management Interface (IPMI).
J3	Global drive fault LED header	2-pin connector Connects to an LED that indicates activity on the drives connected to the adapter.
J4	Default serial boot ROM (SBR) header	2-pin connector Reserved for Lenovo debug.
J5	C0 - Quad x4 SAS Port 5 through Port 8 internal connector	One SFF-8643 mini-SAS HD-4i internal connector Connects the adapter by cable to SAS drives or SATA drives.
	C1 - Quad x4 SAS Port 9 through Port 12 internal connector	One SFF-8643 mini-SAS HD-4i internal connector Connects the adapter by cable to SAS drives or SATA drives.
J6	Global hard disk drive (HDD) activity LED header	2-pin connector Connects to an LED that indicates activity on the drives connected to the adapter.

Table 1 LEDs, Jumpers ,and Connectors (Continued)

Jumper/ Connector	Type	Description
J7	Reserved for Lenovo debug.	3-pin connector Reserved for Lenovo use.
J8	On-board serial Universal Asynchronous Receiver/Transmitter (UART) connector	4-pin port Reserved for Lenovo debug.
LED 1	Power sequence heartbeat	Used for power-on and power-off sequencing.
LED 2	ROC Over-temperature	This yellow LED stays solid on to indicate that the SAS3408 device temperature sensor is over temperature threshold. When the device is in the proper temperature range, the LED is off.
LED 3	System heartbeat	This green LED indicates that the SAS3408 ROC ASIC is operating normally. This LED blinks at 1 Hz.

2.6 Safety Characteristics

All ThinkSystem RAID adapters and HBAs meet or exceed the requirements of UL flammability rating 94 V0. Each bare board is also marked with the supplier name or trademark, type, and UL flammability rating. For the boards installed in a PCIe bus slot, all voltages are lower than the Safety Extra Low Voltage (SELV) 42.4V limit.

2.6.1 Marks, Certifications and Compliance

The design and implementation of the ThinkSystem adapters minimize electromagnetic emissions, susceptibility to radio frequency energy, and the effects of electrostatic discharge. The storage adapters show the following marks and certifications:

- CE mark
- RCM mark
- FCC Self-Certification logo
- Canadian Compliance Statement
- KCC
- Taiwan BSMI
- Japan VCCI
- CISPR Class B

The adapter is compliant with the following standards:

- CSA C22.2 No. 60950-1-07 2nd Edition 2014-10
- UL 60950-1 2nd Edition 2014-10-14
- UL file number E257743

Appendix A: Getting Help and Technical Assistance

If you need help, service, or technical assistance or just want more information about Lenovo products, you can find a wide variety of sources available from Lenovo to assist you.

On the World Wide Web, up-to-date information about Lenovo systems, optional devices, services, and support are available at <http://datacentersupport.lenovo.com>.

A.1 Contacting Support

You can contact support to obtain help for your issue.

You can receive hardware service through a Lenovo Authorized Service Provider. To locate a service provider authorized by Lenovo to provide warranty service, go to <https://datacentersupport.lenovo.com/us/en/serviceprovider> and use filter to search for different countries.

For Lenovo support telephone numbers, go to <https://datacentersupport.lenovo.com/us/en/supportphonenumber>. In the U.S. and Canada, call 1-800-426-7378. In the U.S. and Canada, hardware service and support is available 24 hours a day, 7 days a week. In the U.K., these services are available Monday through Friday, from 9 a.m. to 6 p.m.

China Product Support

To contact product support in China, go to <http://support.lenovo.com.cn/lenovo/wsi/es/ThinkSystem.html>, You can also call 400-106-8888 for product support. The call support is available Monday through Friday, from 9 a.m. to 6 p.m.

Taiwan Product Support

To contact product support for Taiwan, call 0800-016-888. The call support is available 24 hours a day, 7 days a week.

Appendix B: Notices

Lenovo may not offer the products, services, or features discussed in this document in all countries. Consult your local Lenovo representative for information on the products and services currently available in your area.

Any reference to a Lenovo product, program, or service is not intended to state or imply that only that Lenovo product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any Lenovo intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any other product, program, or service.

Lenovo may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

Lenovo (United States), Inc.

1009 Think Place

Morrisville, NC 27560

U.S.A.

Attention: Lenovo VP of Intellectual Property

LENOVO PROVIDES THIS PUBLICATION "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some jurisdictions do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This information could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. Lenovo may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time without notice.

The products described in this document are not intended for use in implantation or other life support applications where malfunction may result in injury or death to persons. The information contained in this document does not affect or change Lenovo product specifications or warranties. Nothing in this document shall operate as an express or implied license or indemnity under the intellectual property rights of Lenovo or third parties. All information contained in this document was obtained in specific environments and is presented as an illustration. The result obtained in other operating environments may vary.

Lenovo may use or distribute any of the information you supply in any way it believes appropriate without incurring any obligation to you.

Any references in this publication to non-Lenovo Web sites are provided for convenience only and do not in any manner serve as an endorsement of those Web sites. The materials at those Web sites are not part of the materials for this Lenovo product, and use of those Web sites is at your own risk.

Any performance data contained herein was determined in a controlled environment. Therefore, the result obtained in other operating environments may vary significantly. Some measurements may have been made on development-level systems and there is no guarantee that these measurements will be the same on generally available systems. Furthermore, some measurements may have been estimated through extrapolation. Actual results may vary. Users of this document should verify the applicable data for their specific environment.

B.1 Trademarks

Lenovo and ThinkSystem are trademarks of Lenovo in the United States, other countries, or both.

Other company, product, or service names may be trademarks or service marks of others.

B.2 Important notes

Processor speed indicates the internal clock speed of the microprocessor; other factors also affect application performance.

CD or DVD drive speed is the variable read rate. Actual speeds vary and are often less than the possible maximum.

When referring to processor storage, real and virtual storage, or channel volume, KB stands for 1 024 bytes, MB stands for 1 048 576 bytes, and GB stands for 1 073 741 824 bytes.

When referring to hard disk drive capacity or communications volume, MB stands for 1 000 000 bytes, and GB stands for 1 000 000 000 bytes. Total user-accessible capacity can vary depending on operating environments.

Maximum internal hard disk drive capacities assume the replacement of any standard hard disk drives and population of all hard-disk-drive bays with the largest currently supported drives that are available from Lenovo.

Maximum memory might require replacement of the standard memory with an optional memory module.

Each solid-state memory cell has an intrinsic, finite number of write cycles that the cell can incur. Therefore, a solid-state device has a maximum number of write cycles that it can be subjected to, expressed as total bytes written (TBW). A device that has exceeded this limit might fail to respond to system-generated commands or might be incapable of being written to. Lenovo is not responsible for replacement of a device that has exceeded its maximum guaranteed number of program/erase cycles, as documented in the Official Published Specifications for the device.

Lenovo makes no representations or warranties with respect to non-Lenovo products. Support (if any) for the non-Lenovo products is provided by the third party, not Lenovo.

Some software might differ from its retail version (if available) and might not include user manuals or all program functionality.

B.3 Recycling information

Lenovo encourages owners of information technology (IT) equipment to responsibly recycle their equipment when it is no longer needed. Lenovo offers a variety of programs and services to assist equipment owners in recycling their IT products. For information on recycling Lenovo products, go to: <http://www.lenovo.com/recycling>

US & Canada Only

US & Canada Only

B.4 Particulate Contamination

Attention: Airborne particulates (including metal flakes or particles) and reactive gases acting alone or in combination with other environmental factors such as humidity or temperature might pose a risk to the device that is described in this document.

Risks that are posed by the presence of excessive particulate levels or concentrations of harmful gases include damage that might cause the device to malfunction or cease functioning altogether. This specification sets forth limits for particulates and gases that are intended to avoid such damage. The limits must not be viewed or used as definitive limits, because numerous other factors, such as temperature or moisture content of the air, can influence the impact of particulates or environmental corrosives and gaseous contaminant transfer. In the absence of specific limits that are set forth in this document, you must implement practices that maintain particulate and gas levels that are consistent with the protection of human health and safety. If Lenovo determines that the levels of particulates or gases in your environment have caused damage to the device, Lenovo may condition provision of repair or replacement of devices or parts on implementation of appropriate remedial measures to mitigate such environmental contamination. Implementation of such remedial measures is a customer responsibility.

Table 2 Limits for Particulates and Gases

Contaminant	Limits
Particulate	<ul style="list-style-type: none"> ■ The room air must be continuously filtered with 40% atmospheric dust spot efficiency (MERV9) according to ASHRAE Standard 52.2^a. ■ Air that enters a data center must be filtered to 99.97% efficiency or greater, using high-efficiency particulate air (HEPA) filters that meet MIL-STD-282. ■ The deliquescent relative humidity of the particulate contamination must be more than 60%^b. ■ The room must be free of conductive contamination such as zinc whiskers.
Gaseous	<ul style="list-style-type: none"> ■ Copper: Class G1 as per ANSI/ISA 71.04-1985^c ■ Silver: Corrosion rate of less than 300 Å in 30 days

- a. ASHRAE 52.2-2008 - *Method of Testing General Ventilation Air-Cleaning Devices for Removal Efficiency by Particle Size*. Atlanta: American Society of Heating, Refrigerating and Air-Conditioning Engineers, Inc.
- b. The deliquescent relative humidity of particulate contamination is the relative humidity at which the dust absorbs enough water to become wet and promote ionic conduction.
- c. ANSI/ISA-71.04-1985. *Environmental conditions for process measurement and control systems: Airborne contaminants*. Instrument Society of America, Research Triangle Park, North Carolina, U.S.A.

B.5 Telecommunication regulatory statement

This product may not be certified in your country for connection by any means whatsoever to interfaces of public telecommunications networks. Further certification may be required by law prior to making any such connection. Contact a Lenovo representative or reseller for any questions.

B.6 Electronic emission notices

When you attach a monitor to the equipment, you must use the designated monitor cable and any interference suppression devices that are supplied with the monitor.

B.7 Federal Communications Commission (FCC) statement

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radiocommunications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his own expense.

Properly shielded and grounded cables and connectors must be used in order to meet FCC emission limits. Lenovo is not responsible for any radio or television interference caused by using other than recommended cables and connectors or by unauthorized changes or modifications to this equipment. Unauthorized changes or modifications could void the user's authority to operate the equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that might cause undesired operation.

B.8 Industry Canada Class A emission compliance statement

This Class A digital apparatus complies with Canadian ICES-003.

B.9 Avis de conformité à la réglementation d'Industrie Canada

Cet appareil numérique de la classe A est conforme à la norme NMB-003 du Canada.

B.10 Australia and New Zealand Class A statement

Attention: This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

B.11 European Union EMC Directive conformance statement

This product is in conformity with the protection requirements of EU Council Directive 2014/30/EU on the approximation of the laws of the Member States relating to electromagnetic compatibility. Lenovo cannot accept responsibility for any failure to satisfy the protection requirements resulting from a non-recommended modification of the product, including the installation of option cards from other manufacturers.

This product has been tested and found to comply with the limits for Class A equipment according to European Standards harmonized in the Directives in compliance. The limits for Class A equipment were derived for commercial and industrial environments to provide reasonable protection against interference with licensed communication equipment.

Lenovo, Einsteinova 21, 851 01 Bratislava, Slovakia

B.12 CE

Figure 3

Warning: This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.

B.13 Germany Class A statement

Deutschsprachiger EU Hinweis: Hinweis für Geräte der Klasse A EU-Richtlinie zur Elektromagnetischen Verträglichkeit

Deutschsprachiger EU Hinweis:

Hinweis für Geräte der Klasse A EU-Richtlinie zur Elektromagnetischen Verträglichkeit Dieses Produkt entspricht den Schutzanforderungen der EU Richtlinie 2014/30/EU zur Angleichung der Rechtsvorschriften über die elektromagnetische Verträglichkeit in den EU-Mitgliedsstaaten und hält die Grenzwerte der Klasse A der Norm gemäß Richtlinie.

Um dieses sicherzustellen, sind die Geräte wie in den Handbüchern beschrieben zu installieren und zu betreiben. Des Weiteren dürfen auch nur von der Lenovo empfohlene Kabel angeschlossen werden. Lenovo übernimmt keine Verantwortung für die Einhaltung der Schutzanforderungen, wenn das Produkt ohne Zustimmung der Lenovo verändert bzw. wenn Erweiterungskomponenten von Fremdherstellern ohne Empfehlung der Lenovo gesteckt/eingebaut werden.

Deutschland:

Einhaltung des Gesetzes über die elektromagnetische Verträglichkeit von Betriebsmitteln

Dieses Produkt entspricht dem „Gesetz über die elektromagnetische Verträglichkeit von Betriebsmitteln“ EMVG (früher „Gesetz über die elektromagnetische Verträglichkeit von Geräten“). Dies ist die Umsetzung der EMV EU Richtlinie 2014/30/EU in der Bundesrepublik Deutschland.

Zulassungsbescheinigung laut dem Deutschen Gesetz über die elektromagnetische Verträglichkeit von Betriebsmitteln, EMVG vom 20. Juli 2007 (früher Gesetz über die elektromagnetische Verträglichkeit von Geräten), bzw. der EMV EU Richtlinie 2014/30/EU, für Geräte der Klasse A.

Dieses Gerät ist berechtigt, in Übereinstimmung mit dem Deutschen EMVG das EG-Konformitätszeichen - CE - zu führen. Verantwortlich für die Konformitätserklärung nach Paragraph 5 des EMVG ist die Lenovo (Deutschland) GmbH, Meitnerstr. 9, D-70563 Stuttgart.

Informationen in Hinsicht EMVG Paragraph 4 Abs. (1) 4:

Das Gerät erfüllt die Schutzanforderungen nach EN 55024 und EN 55032 Klasse A.

Nach der EN 55032: „Dies ist eine Einrichtung der Klasse A. Diese Einrichtung kann im Wohnbereich Funkstörungen verursachen; in diesem Fall kann vom Betreiber verlangt werden, angemessene Maßnahmen durchzuführen und dafür aufzukommen.“

Nach dem EMVG: „Geräte dürfen an Orten, für die sie nicht ausreichend entstört sind, nur mit besonderer Genehmigung des Bundesministers für Post und Telekommunikation oder des Bundesamtes für Post und Telekommunikation betrieben werden. Die Genehmigung wird erteilt, wenn keine elektromagnetischen Störungen zu erwarten sind.“ (Auszug aus dem EMVG, Paragraph 3, Abs. 4). Dieses Genehmigungsverfahren ist nach Paragraph 9 EMVG in Verbindung mit der entsprechenden Kostenverordnung (Amtsblatt 14/93) kostenpflichtig.

Anmerkung: Um die Einhaltung des EMVG sicherzustellen sind die Geräte, wie in den Handbüchern angegeben, zu installieren und zu betreiben.
